```
Individual elements first use: server-side includes (SSI) and hypertext markup language (HTML).

Individual elements next use: SSI and HTML.

Multi-entry first use: SSI enabled HTML (SHTML).

Multi-entry next use: SHTML.

Individual entry first use: SHTML.

Resetting all:

Multi-entry first use: server-side includes enabled hypertext markup language (SHTML).

Multi-entry next use: SHTML.

Individual elements: SSI and HTML.

Resetting all:

Individual entry first use: SSI enabled HTML (SHTML).

Multi-entry first use: server-side includes SHTML hypertext markup language. (Wrong!)
```
